### Developing Metacognition and Self-regulation in the Classroom

Pupils make an average of seven months' additional progress when metacognition and self-regulation are modelled and taught. This training will build on your understanding of metacognition and how to develop pupils' awareness and management of their learning, You will take away strategies to embed metacognitive development into your teaching and ways to record pupil thinking.

### Walk in their Shoes

This presentation explores SEND and encourages delegates to think about how these learners see the world and what helps them 'thrive rather than just survive' [Beth Mitchell] in our education system. Strengths and challenges are explored and coping strategies suggested.
